SECURITY & GETTING STARTED WITH AZURE

SECURITY BEST PRACTICES

Use Multi-Factor Authentication (MFA)
Add an extra layer of security.

Apply Role-Based Access Control (RBAC)
Manage user permissions.

Encrypt Sensitive Data
Keep your data secure.

Maintain Regular Backups
Protect against data loss.

Monitor Security Alerts
Identify and respond to threats.

Review Access Permissions
Remove unnecessary access regularly.

HOW TO GET STARTED

1. Identify your business requirements.
2. Choose the right Azure services.
3. Plan your migration and security.
4. Set budgets and spending alerts.
5. Monitor performance and usage.
6. Optimize resources as your business grows.

POWER YOUR BUSINESS WITH AZURE

Secure. Flexible. Scalable.
